

# SIMPLY THE BEST ONE PIECE WOODEN CYLINDERS AVAILABLE

For more than 60 years Keller Products has been the leader in molded plywood products. With our extensive experience in both the development of specialized machinery and our in-house capabilities of designing and building our own dies and forming tools, we offer you the finest, largest selection of one piece wooden cylinders on the market anywhere. We can provide you with cylinders in your choice of exterior veneers, such as Walnut, Cherry, Honduras Mahogany, White Oak, Red Oak and Maple, or a veneer to your specifications. The benefits of one piece construction will become obvious as you apply them to your specific needs. **SAVE ON LABOR** - No time consuming mess of gluing two pieces together or the frustration of trying to match grains.

**STRENGTH** - One piece construction inherently gives you a much stronger cylinder allowing you to use a thinner wall for more strength and less weight.

**VARIETY** - We offer lamination grade wooden cylinders in diameters from 6" to 36" and in standard lengths of up to 27 1/2". Columns are available in standard heights according to the chart below, or custom heights for specific applications. All cylinders are available with or without caps, flush or regular, access doors, and wire manager cut-outs.

**READY TO FINISH** - Will not soak up paint or glue as with other types of cylinders. Smooth finished and ready to laminate, paint, or finish in the top coat you desire.
